

CASE STUDY

ET Irrigation

After being hired in 2015 by Champagne HOA, ET Irrigation's management has sustained savings of **20%** below the previous 5-year historical average.

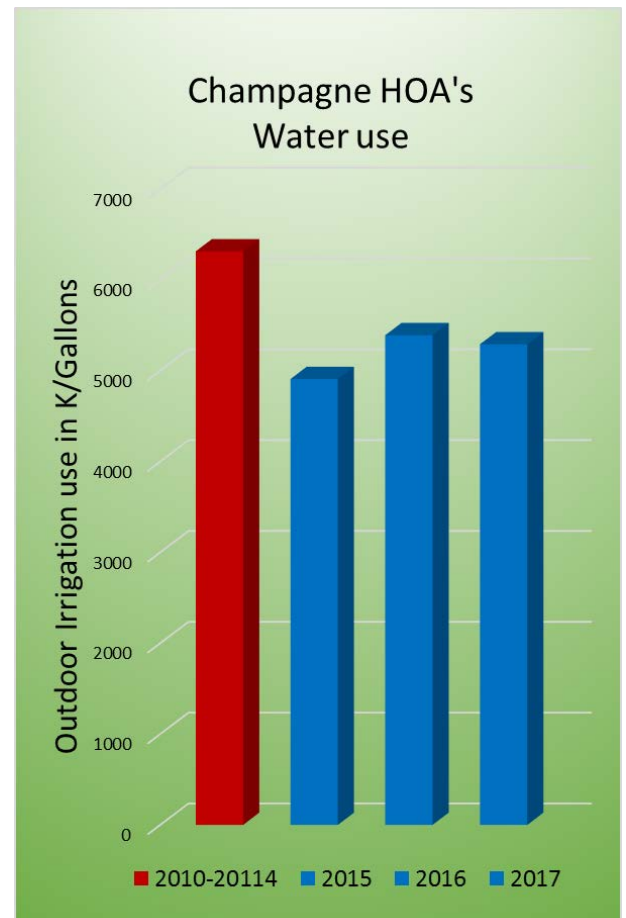

For Changes to the City of Aurora's 2017 Irrigation Rebate Program please call 303.739.7195

CHALLENGE

ET Irrigation was presented an opportunity to identify a property that would be conducive to a pilot study being conducted by the Aurora Water Conservation Department and to help facilitate the pilot study parameters.

PILOT PARAMETERS

- Conduct an audit and create a map of the existing irrigation system.
- Install weather-based irrigation controllers at all controller locations
- Complete "in-ground" improvements to the irrigation system within one of three scenarios
- Implement sustainable irrigation management practices

"Our goal was to provide reliable data to the City of Aurora. This data helped the city identify the benefits of "Smart Irrigation" Controllers, In-ground improvements and Sustainable Irrigation management practices on existing irrigation sites and help create a more efficient and affective rebate program.
